

Hedgehogs

Class News

Teacher – Mrs B Harris

Teaching Assistant – Mrs S Parker

Let's investigate and explore Nature!

A super start to the autumn term! In Hedgehogs class we have been busy settling into our new class and making new friends. The weather has been kind and so we have been able to get out and about.

Our topic this term is all about exploring nature and we have been

investigating the school grounds and local parks, and then drawing maps of our journeys.

We have been mixing autumn colours, and counting twigs and acorns in maths. Here we are counting and grouping real objects...

then we used dienes to show 2 and 3 digit numbers.

Can you see what we are growing in science lessons?

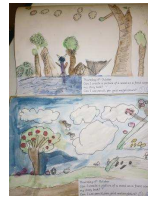

We have been learning about plants and seeds in science-

We also went to Snowdrop Woods at Saltram House to make dens, hunt for natural treasure, whittle a woodland friend, make magic mud potions and pictures out of leaves.

When we got back to school we planned our own stories about an adventure in the wild woods.

We designed and made booklets.

We have recently gone to Tesco to experience their Harvest Trail and to taste lots of different apples, including dried and freeze dried, which were crisp and crunchy! We tried 3 different types of apples – Egremont Russet, Royal Windsor and Gala. Which is your favourite apple?

In harvest week we will be baking lots of apple goodies and also trying our hand at some apple printing, all of which will be on sale at our Apple Tea. Yum, yum! Do join us!
