

Hedgehogs

Class News

Teachers – Mrs Harris
Teaching Assistant – Mrs Hawkins

What a busy half term we have had! We have been making the most of the sunny weather and doing lots of our learning outdoors.

Science

We searched the school grounds for mini beasts and found all sorts of exciting snails, beetles, worms, woodlice and millipedes – we just couldn't count the number of legs!

Having looked after our tadpoles in class we were happy to be able to put them back into the pond as they began to turn into frogs. We used this experience to write a set of instructions for anyone else who is thinking of keeping tadpoles. Please read our advice in our writing books. We also went pond dipping in science lessons, with Mrs Loveday, and found water snails and newts.

Maths

We have been out and about, measuring and investigating the capacity of different containers.

Literacy

We are currently looking at the story called The Bog Baby by Jeanne Willis. The story is all about two children who found an unusual creature in a pond which they took back home with them. We used this story as a basis for our own stories which we are in the process of writing now.

Topic

We have continued to learn about animals this half term. We have also enjoyed learning about dinosaurs and fossils. We really enjoyed listening to Mrs Robertson talk to us all about fossils and we learnt lots of interesting facts. We used our new knowledge and the information from our research to create a book about fossils.

Sports Day

Thanks to the lovely weather we have enjoyed lots of swimming lessons and a brilliant Sports Day. We all challenged ourselves and did our best!
