## Class News

**Teachers – Mrs Chapman and Mrs Loveday**

**Teaching Assistants – Mrs Jones, Miss Bennett and Mrs Short**

Welcome to our last news page of this academic year - all three terms have whizzed by so fast! We have, as usual, packed this final half-term full of an array of challenging, thought-provoking and fun-filled learning opportunities. The splendid weather has facilitated many occasions for outdoor learning and we have relished these.

In maths, we have been developing our knowledge of weights and measures. We had a fun lesson weighing bottles and jars from Mrs Loveday's kitchen cupboards!

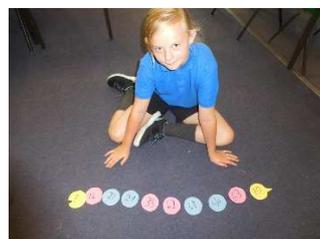

Sophie, Amy and Lauren estimate the mass and then weigh a carton of milk.

Ryan and George use the digital scales to weigh one packet, then use their times tables knowledge to work out how heavy 3 packets are.

We spent two weeks really mastering our times tables, before using our knowledge to solve tricky multiplication and division problems. Here are Harvey and Olivia with their 7x table number snakes!

As part of our topic, 'Fire and Fossils – The World Beneath Our Feet', we have studied the life story of Mary Anning. We have used her story to provide the stimulus for superb play script writing and wonderful newspaper articles.

Our trip to Charmouth was wonderful and our children relished the opportunity to show off their fantastic fossil knowledge! The children were amazed by how many fossils were just lying on the beach, ready to be collected and taken home!

All hands up at the Visitor Centre.

Anna-Mae finds a fossil.

Time for a paddle!

Last of all, Stoats class really enjoyed sharing their super creations in the Year 3/4 open-air display of outdoor art. What a great way to present their work!

Thank you for your wonderful support throughout the academic year - it is certainly very much appreciated. We wish you all a glorious summer holiday.
